Professional Summary

Computer Science student trained in Data Science and Machine Learning at NTI , professional foundations at ALX and currently specializing as a Machine Learning Engineering Trainee in the DEPI with practical hands-on training and project-based learning. Motivated to apply and further develop technical and analytical abilities through an internship, while contributing to impactful projects and gaining valuable industry experience Currently specializing as a Machine Learning Engineer Trainee in the DEPI

Experience

Machine Learning Engineer | DEPI Des 2025 – Present

AI Pipelines: Designed and deployed end-to-end Computer Vision & NLP models.
MLOps & Tools: Managed experiments using MLflow and built models via Azure ML.
Development: Executed EDA, Feature Engineering (SMOTE), and Hyperparameter Tuning.
Tech Stack: Python, Scikit-learn, and predictive modeling for real-world applications.

Data Science Trainee | NTI Jun 2025 – Jan 2025

Technical Training: Completed 120 hours of hands-on data science and machine learning applications.
ML & Analysis: Python, SQL, Pandas, Scikit-Learn, XGBoost, and K-Means.
Optimization: Feature Engineering (SMOTE), Hyperparameter Tuning, and Evaluation.
Tools**:** Jupyter Notebook, Google Colab, Matplotlib, and Seaborn.

Professional Foundations Trainee | ALX Aug 2024 – Oct 2024

Professional Development: Completed a 3-month intensive program focused on soft skills for tech careers.
Collaboration: Applied Critical Thinking and Project Management within a cross-functional team project.
Core Skills: Communication, Problem-Solving, Time Management, and Teamwork.

Projects

Mental Health Prediction (NTI - Graduation Project): Collaborated to build a model predicting mental-health treatment needs; developed full pipeline from preprocessing to evaluation.

Foreign Exchange Rates Analysis (Team Project): Collaborated on multi-year currency analysis vs. USD; performed time-series exploration and presented insights.

Education Support Platform (ALX): Contributed to a collaborative platform helping students learn; involved in teamwork, planning, and presentation.

Courses & Certifications

Data Science Track (NTI) – Completed, Certificate Pending Covered Python, Data Analysis, Machine Learning, SQL, Data Visualization, and Statistics. .

Professional Foundation (ALX) – Certificate Earned

Education

. Higher Technology Institute (HTI), 10th of Ramadan City Sep 2023 – Present

.Computer Science
